

Liberty[™]

Income-Eligible Multi-Family Program

Energy efficiency improvements that benefit everyone

Liberty offers two ways for owners of eligible multi-family properties to take advantage of incentives for making energy-efficient upgrades to tenant units and common areas. Property owners can participate in both programs to maximize energy and cost savings, as well as make your property more comfortable and safer for residents.

Take advantage of our direct install program to receive a selection of energy-saving products at no cost to you. Items like LED bulbs, efficient-flow showerheads, and faucet aerators can be installed in each tenant unit, improving energy efficiency and increasing residents' comfort.

Let us help you identify additional energy efficiency opportunities, such as installing LED lighting in common areas and weatherizing your building, that can further improve your bottom line.

To learn more about our Low-Income Multi-Family program and rebates, or to get started, contact our Liberty Program Manager.
