

Liberty[®]

Small Business Direct Install Program

Big savings for your small business

The Liberty Small Business Program is designed for Missouri electric commercial customers who operate small businesses. These tailored services can help you reduce overhead, increase productivity, and improve the overall customer experience – all at the same time.

When you're managing cash flows and controlling costs down to the penny, every bit helps. We partner with a local small business energy consultant who will help you take advantage of rebates and incentives from Liberty. Your small business energy consultant will assess your equipment and explain your opportunities for saving energy.

Together, you'll develop an action plan, and your consultant will walk you through the process. When the work is done, Liberty pays up to 70% of the project costs.

The benefits to your business include:

Free on-site analysis of your energy use

Simple, inexpensive options for managing energy costs

Rebates up to 70% for most lighting upgrades

A qualified small business energy consultant to simplify the process

Rapid return on your investment

To participate, your business must be a Liberty customer on rate plan NS-GS and work with a Liberty qualified small business energy consultant. To see if you qualify, contact us at libertycommercial@icf.com or 1-833-286-0861. Learn more about how your business can save big at libertyutilities.com/moenergyprograms/.
