Arkansas Residential HVAC Rebates

Central Air Conditioner[†] Did you know that heating and cooling your home make up

nearly half of your monthly energy use?*

Depending on the age of your heating and cooling equipment and how it is performing, replacing it could improve comfort while reducing your energy use, resulting in lower monthly energy costs.

As a Liberty Arkansas electric residential customer, you can take advantage of valuable rebates when you upgrade to qualifying energy-saving models.

†Note: SEER refers to the equipment's Seasonal Energy Efficiency Ratio, a measure of its energy efficiency. To receive a rebate, all heating and cooling equipment must be Air-Conditioning, Heating and Refrigeration Institute (AHRI) rated.

SEER 16, EER 13 - New Installation or Replacing Existing Equipment SEER 17, EER 13 - New Installation or Replacing Existing Equipment SEER 18, EER 13 – New Installation or Replacing Existing Equipment SEER 19, EER 13 - New Installation or Replacing Existing Equipment SEER 20, EER 13 - New Installation or Replacing Existing Equipment Heat Pump Ductless Mini-Splits[†] SEER 16, EER 13, HSPF 9 – New Installation or Replacing Existing Equipment SEER 17, EER 13, HSPF 9.5 - New Installation or Replacing Existing Equipment SEER 18, EER 13, HSPF 10 - New Installation or Replacing Existing Equipment SEER 19, EER 13, HSPF 10 – New Installation or Replacing Existing Equipment SEER 20, EER 13, HSPF 10 – New Installation or Replacing Existing Equipment \$500 Air Source Heat Pump (ASHP)† SEER 16, EER 13, HSFP 9 – New Installation or Replacing Existing Equipment SEER 17, EER 13, HSFP 9.5 - New Installation or Replacing Existing Equipment \$550

SEER 18, EER 13, HSFP 10 – New Installation or Replacing Existing Equipment Ground Source Heat Pump (GSHP)[†]

Understanding your equipment

You may be asking yourself, "How do I know if I need new equipment?" The truth is you can watch (and listen) for signs that your equipment is no longer operating properly. You can also get advice from an HVAC contractor.

When and why to consider an upgrade

Your equipment is 10 or more years old

Your energy bills consistently go up

Your equipment needs frequent repairs

Your heating and ooling system is noisy

Your home has humidity problems

Maintenance matters

Once you upgrade to more energy-efficient equipment, be sure to chedule yearly tune-ups with your HVAC contractor to maintain your system's optimal performance. Make sure to change your air filters at least every three months as well—possibly monthly during times of heavier use, like summer.

Visit https://central.libertyutilities.com/all/residential/ways-tosave/rebates.html for even more programs designed to help you save energy and money at home.

Or call **1-800-206-2300** for more information, you can also email us at **energy.efficiency@libertyutilities.com**.

Required document checklist:

AHRI Certificate	Copy of customer's invoice	Sign and complete this form for the rebate
Installation date:		HVAC rebate amount (from page 1):

Customer completion: I acknowledge the above is true and correct. By signing below, I agree to allow Liberty to perform a site verification of the installed equipment. I also understand that the failure to allow an inspection for verification of the install, if chosen for a QA/QC Audit, may result in the forfeiture of the rebate amount.
