

Jan. 22, 2026: Attention water customers in Kissee Mills, Missouri

Repairs have been scheduled for our Lakeway water system in Kissee Mills, Missouri. Work is scheduled to begin at 11:30 this morning and all customers on that system will be affected for approximately three hours.

Once the work is completed, a precautionary voluntary boil advisory is in effect until further notice for customers on that system. This will allow for a required bacterial test to ensure the system is safe.

Customers are encouraged to follow the safety guidelines below.

During a boil advisory, it is recommended that customers:

- Boil water vigorously for three minutes prior to use for cooking or drinking.
- Let water cool sufficiently before drinking.
- Disinfect food contact surfaces (dishes) by immersing them for at least one minute in clean tap water that contains one teaspoon of unscented household bleach per gallon of water.
- Dispose of ice cubes and remake with water that has been boiled.
- Water used for bathing does not need to be boiled.
